

Purpose and overview

PPG, meaning Pro-Pac Packaging Limited (ASX:PPG) and its subsidiaries, will strive to supply the industry with the highest quality products, customer service and on-time deliveries. We will achieve this by specialising in the procurement, warehousing and distribution of packaging and supporting products and services to the industry; including the design and manufacture of industrial, flexible and rigid packaging products, extending to products made from recycled plastics and wood. Our principle objective is to meet and exceed customer expectations through all aspects of the business and to deliver superior total customer satisfaction and confidence in our products and our services.

We will be recognised as innovative, and will be a leader in the industry in experience and expertise.

The knowledge and specialised skills that we have in the packaging industry, along with technology, quality management processes, and attention to food safety, environment and ethics, shall provide the core of the Management System.

We will be committed to supplying the industry with quality products and will strive to continually improve the processes and products it provides.

We aim to be the leader in the industry through innovative and best practice management systems and products, and to satisfy its customers' current and future needs.

We will achieve this commitment by the development and implementation of a suite of measurable targets and objectives.

Responsibilities

Executive Management and Leadership teams are fully committed to the successful implementation and maintenance of the Quality Management System and recognise that all personnel are expected to actively participate in all quality related activities

Policy Statement

To ensure the successful implementation of this policy, PPG will maintain an effective and efficient externally audited and certified Quality Management System (QMS) based on the principles of the international standard ISO9001:2015 for Quality Management Systems and the food safety principles of HACCP, in accordance with international guidelines as defined in Hazard and Critical Control Point (HACCP) System and Guidelines for its Application, Alinorm 97/13 published by the CODEX Alimentarius Commission. It is our aim to ensure first class GMP principles based on industry best practice are implemented within our business units.

The company will meet its Legal and Statutory obligations as regulated by Commonwealth and state law where applicable, including FSANZ, Environmental Protection Acts and state Workplace Health and Safety acts and regulations.

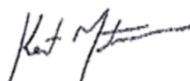

The company will comply with any special customer requirements and specific needs as advised by the customer.
